HOPEWELL

PROBLEM STATEMENT

- Many people lack access to early cancer screening or awareness.

- Emotional support for patients and families is often limited.

- Online information is scattered and unreliable.

- HopeWell solves these issues by creating one platform for screening + guidance + community support

HopeWell

OBJECTIVES

- Provide an easy-to-use cancer risk assessment tool.
- Offer an AI-based symptom pre-screening assistant.
- Build a safe and supportive community for patients, survivors, and caregivers.
- Share verified resources and educational material.

HopeWell

SYSTEM FEATURES

Risk Assessment
- Predicts possible cancer risk levels using structured questions.

AI Pre-Screening Chat
- Helps users understand symptoms (not a medical diagnosis).

Live Support Community
- Real-time chat for emotional support and sharing experiences.

Resources & Support Groups
- Access to tools, articles, and survivor communities.

HopeWell

SNAPSHOTS

NAVIGATION

A welcoming home interface with quick access to:
- Risk Assessment
- Pre-Screening
- Live Community

RISK ASSESSMENT

- Simple question-based flow
- Covers age, lifestyle, family history, and symptoms
- Designed for non-experts

COMMUNITY SUPPORT

- Real-time chats
- Connect with survivors, caregivers, and patients
- Emotional support anytime

PRE-SCREENING

- AI chatbot explains symptoms in simple language
- Safe disclaimer: Not a doctor
- Helps users understand when to seek medical help

HopeWell

KEY BENEFITS

- Early Awareness: Simple risk screening
- Emotional Support: Real-time community
- Reliable Info: Verified resources
- Safe & Anonymous: Privacy-first design
- 24/7 Availability

HopeWell

CONCLUSION

- HopeWell is a complete support ecosystem for cancer awareness and guidance.
- It empowers users emotionally, psychologically, and through knowledge.
- A step toward accessible and community-driven healthcare.
